COMPACTTILT™ ROTATOR™

Compacttilt™ Rotators is a powerful choice for your excavator as it adds maximum efficiency to the excavator. Some of the selected key points for choosing Compacttilt Rotator is:

- Compacttilt Rotator adds maximum versatility with full rotation and 2x50° tiltangle
- It becomes easy and efficient to change tools
- The operator can stay in the operate fully from the cab and spends his time effectively.
- Compacttilt Rotator is the narrowest and most compact tiltrotator on the market. Making the machine able to work in narrow gutters and under complex conditions. This is important in e.g. urban zones or when the task is to be solved efficiently.
- With full rotation, the machine can do versatility work and more operations are completed from the same point without the operator leaving the cab.
- Great safety as the operator can solve by far the most tasks - also change of tools, from the cab.

Compacttilt differs by:

1. Unique with no cylinders - nothing is in the way on the sides of the digging arm

2. Whole 2x50° tilt degrees - for maximum feasibility in the digging arm

3. The product is created for efficient work in narrow grooves

4. Dansk developed and manufactured - by 380°Invent

5. Consists of the unique patented Compacttilt motor - that creates a strong motor with minimal number of wear parts

6. All wear parts are interchangeable

7. Components are made in high-strength steel

8. Opportunity for rotation sensor on all sizes

9. More opportunities for advanced control systems - for optimal user experience and ease of use

10. Unique low weight which ensures more payload per shovel

11. Increased efficiency with up to 50%

Compacttilt™ product family.
The smallest tilt products on the market for machines in weight class 0-10T

Compacttilt™ have the unique features:

- No cylinders
- Compact and narrow design
- Low weight
- 100 tilt degrees
- Constructed for working effective
- All products are with the unique Compacttilt™ Engine
- Danish developed and produced
